EFFICIENT LOW ENERGY SLUDGE MIXING

Capable of mixing viscous fats, oils and greases

Ragless design and low cost maintenance

Significant energy savings compared to conventional mixing systems

Installation and Capital cost savings

Suitable for both new and existing tanks

Proven to achieve over 90% active tank volume!
Give us a call at 1.855.GO.OVIVO to learn more.
Anaerobic Digestion is highly dependent upon effective sludge mixing. When tank content is inadequately mixed, stratification occurs and the tank volume is not properly utilized. Most wastewater treatment facilities require thorough and complete mixing to ensure uniform temperature, solids distribution and microorganism contact with incoming sludge, to increase gas production and maximize the solids destruction.

Efficient mixing is critical; therefore, the goal is to achieve the optimal mixing efficiency with the least amount of power.

Achieving a unique mixing pattern allows for efficient mixing while keeping the energy requirements lower (allowing for the amount saved to be used elsewhere at the plant).

Independent full scale testing has proven the lower energy needs compared to conventional mixing systems.

Assuming $0.09/kWh, 75% nameplate power and 3% appreciation per year.

### MAIN CONFIGURATIONS FOR THE LM™ MIXER:

- Operating Speed: 30 CPM (cycles per minute)
- Stroke Length: 12 inches, 16 inches or 20 inches
- Disk Size: 72 inches, 84 inches or 96 inches
The LM™ mixer is designed to mix the viscous slurries in order to achieve a homogeneous mixture in the tank while using less energy at the same time. The LM mixer offers solutions to the challenges of mixing wastewater in both thin and thick sludge applications.

The frequency, stroke and size of the hydro-disk control the force and velocity of the liquid core. The LM mixer’s oscillating motion produces a flow pattern that approaches nearly isotropic (uniform) mixing and does not display the turbulence intensity or vortices of rotary mixers. Additionally, LM mixers operate by using pulsating pressure waves in conjunction with the oscillating velocity. In this type of concurrent action the oscillating pressure wave and velocity are coupled together to enhance mass transfer and produce a uniform mixture of the tank’s contents.

Each tank configuration is different and therefore the LM mixer is custom designed to meet a variety of mixing demands by varying the frequency, stroke and disk size. Utilizing the power of Computational Fluid Dynamics (CFD), tanks can be modeled and analyzed for proper mixer sizing.

**KEY BENEFITS**

**EFFICIENT MIXING TO HELP IMPROVE THE DIGESTION PROCESS**

- Does not rely on induced flow to create the necessary mixing.
- Rags do not build up on disk
- Uniform mixing throughout the tank

**PROVEN TECHNOLOGY**

- Multiple LiCl tests performed by third parties demonstrate an active volume of 90% or greater.

**INSTALLATION COST SAVINGS**

- Installation of a single mixer can be completed in a day or less.
- No additional piping needed.
- No core drilling necessary

**SUITEABLE FOR BOTH NEW AND EXISTING TANKS**

- Little to no changes are needed on existing structures
THE OVIVO DIFFERENCE
200+ YEARS OF HERITAGE • 100% FOCUSED ON WATER

OUR EXPERTISE
Anaerobic Digestion is highly dependent upon effective sludge mixing. Ovivo sludge mixers are designed to provide powerful mixing, without accumulating stringy or fibrous material. Highly efficient and featuring low maintenance requirements, they can be used for existing or new digesters. Their configuration is adapted to suit best the specific tank design and application.

ANCILLARY EQUIPMENT
Ovivo can supply all plant required equipment for a complete Sludge Treatment / Anaerobic Digestion plant, including but not limited to:

- Ultrastore™ Membrane Gasholder
- Eimix® Mechanical Sludge Mixer
- Ovivo® Anaerobic Digester Steel Cover
- Sonolyzer™ Ultrasound Sludge Disintegrator

Ovivo® Connect™ portal is an innovative and intuitive application that allows our customers to use ‘SmartTags’ installed on our equipment (or a web URL) to access a personalized customer zone. Access your equipment documentation, find contract references, track service logs, manage spare parts, and plan your next maintenance to get the most out of your equipment.
